Chandan Reddy Akiti

MS in Computer Science & Engineering

chandan047 | chandan047 | +1 616-216-7673 | chandan.akiti047@gmail.com

Education

MS in Computer Science & Engineering - Pennsylvania State Univerisity — Aug 2019 - May 2021 (expected)
GPA : 3.74/4.0 ; **Courses** : Deep Learning, NLP, Computer Vision II, Large-Scale ML, Distributed Systems, Algorithm Analysis

B.Tech in Computer Science & Engineering - Indian Institute of Technology (IIT), Madras — Jul 2011 - May 2015

Experience

Pennsylvania State University, PA — Graduate Research Assistant

Frame Semantics based Information Extraction | Advisors : Anna Squicciarini, Sarah Rajtmajer — Jan 2020 - Present

- Working on Information Extraction, studying information disclosure discourse in twitter user communities during pandemic.
- Conducted research on deep learning techniques for effective information extraction in large text.
- Extensively researched Semantic Role Labeling and Relation Classification tasks. [M.S. Thesis]
- Published research in EMNLP (findings) and AAAI (workshop) conferences.
- Provided comprehensive research assistance and support when designing and executing experiments.

Samsung R&D Institute Delhi, India — Software Development Engineer

Lead Engineer | Healthcare AI (Research) | Vision Intelligence Team — Apr 2018 - Jul 2019

- Developed remote health monitoring algorithms for Samsung Robot using *Computer Vision*, *Signal Processing*.
- **Visual PPG** : Developed a novel algorithm for **heart signal estimation** using **temporal tracking of skin-clusters** in face video.
- Implemented **classification** models for arrhythmia detection using Visual PPG data collected from 250 subjects.

Software Engineer | Fashion Recognition | Vision Intelligence Team — Jun 2017 - Mar 2018

- Developed a **live fashion recommendation** system for E-commerce application in Samsung Smart TV.
- Trained **Faster R-CNN** with contrastive loss for recognizing clothing of 11 classes with a **45% recall @ top-5** retrieval.
- Implemented a “Street Image to In-Shop” **clothing retrieval** deep learning framework.
- Integrated the clothing retrieval framework to Samsung TV Content Recognition system deployed on AWS.

Academic Projects

Few-Shot Learning for Named-Entity Recognition (NER) | MetaLearningForNER — Sep 2020 - Dec 2020

Trained an NER classifier on OntoNotes 5.0 dataset using Prototypical Network in Few-Shot learning setting. Reported the effects of distance metric (euclidean vs hyperbolic), layer-wise performance for BERT and domain transfer ability on WNUT and I2B2’14 data.

Object Tracking with Capsule Networks | RAT-Tracker — Jan 2020 - Apr 2020

Studied the effect of capsule networks on **object tracking** of different motion classes using the GOT-10K dataset. Modified SiamFC object tracker with additional layers of capsule networks. Observed **improvements** in Illumination Variation, Background Clutters, Low Resolution and Motion Blur classes.

Robust Semantic Role Labeling | Robust-SRL — Jan 2020 - Apr 2020

Trained a distributionally robust model for Semantic Role Labeling task in Natural Language Processing. Obtained **better** performance on **low-represented domains** without impacting the overall performance.

Visual Storytelling | Robust-SRL — Sep 2019 - Dec 2019

Trained an encoder-decoder model for generating story for a sequence of images using the Visual Storytelling (VIST) dataset. Presented a hybrid network to visualize cross-image attention.

Skills

Programming	Python, C++, JavaScript, Go, Bash
Machine Learning	PyTorch, TensorFlow, Keras, Scikit-learn
Systems	Node.js, Redis, Apache Thrift, Google V8, Kafka, Zookeeper, Cassandra, MongoDB, SQL
AWS	Elastic Beanstalk, CloudFormation, S3, Auto Scaling, Elasticsearch
